

Xm provides is an amazing tool and opportunity for convenience, ease of use and personal programing choices that aren't available on regular radio programming. I don't mind spending a monthly fee to receive the opportunity to receive music and traffic when I want to receive it, rather than when it may be available on regular programming channels. Please reject the NAB's petition 04-160 and help me retain this great time saving and enjoyable personal "alternative of choice" to regular programming. Thank You! Sincerely, Ralph Boehm
